## PROJECTS

**“Processing-MTA-Subway-Entrance-Data-”**

Hunter College Spring 2018

- *Worked with a dataset consisting of all entrances and exits to the stations of New York City Transit Authority from New York City OpenData. You can list all stations of a specific line, find the nearest entrance that are closest to a given GPS location. (<https://github.com/csWendy/Processing-MTA-Subway-Entrance-Data->)*

**“New York City Street Tree Census Data”**

Hunter College Spring 2018

- *Created a program that allows users to manipulate the NYC open data set, “the 2015 Street Tree Census” by inputing commands such as counting the number of trees of a given species, borough by borough, or commuter the distance of trees by a given GPS location. (<https://github.com/csWendy/Processing-2015-New-York-City-Street-Tree-Census-Data>)*

**“Color Mixer”**

Queens College Summer 2018

- *Created an interactive Color Mixer with 3 Slide Bars: Red, Green and Blue. User can slide any bar to set color for the windows and get the corresponding pixel numbers. (<https://github.com/csWendy/Color-Mixer-with-Slider-Bars>)*
